

## Sig- Alarm

(CLICK HERE FOR THE RATING LIST)

### Evaluation:

Dear Concretepumping.com,

Berkeley Concrete Pumping has been testing SIGALARMS's unit now for 3 months and from our evaluation we have decided to outfit our entire fleet of 40 boom pumps. Berkeley Concrete Pumping has always been very concerned with the safety of our employee's as well as our customers. The implementation of SIGALARMS warning device has been our most important additions to our safety program. The cost of SIGALARM is insignificant and is out weighed by the security of having a device that will continue to keep Berkeley Concrete Pumping and our industry on the leading edge of operator and customer safety.

Berkeley Concrete Pumping has a reputation of superior safety and the service in the Northern and Central California construction industry. With the continued help and support of SIGALARM we will continue to provide the finest and safest concrete service available.

I would like to take this opportunity to thank SIGALARM for providing a user friendly safety device with an extremely professional installation. Our customers have become accustomed to a very professional and safe company, SIGALARM only adds to our reputation, professionalism and our superior safety record.

Sincerely,
